

# Exploring Active Approaches to Embedded Teaching and Learning

One-day training course for the Learning & Skills Sector

**4<sup>th</sup> Dec 09,  
ACER, St. Ives**

**Cost: £40**

*This reduced fee is due to funding through ACER's Regional Mathematics Centre, available for a limited time only (usual rate: £95).*

“Excellent resources & ideas, really good productive day. ”

“I found the approach used to demonstrate resources very helpful. The information and pace of delivery were just right. ”

## **Aim:**

The aim of the course is to introduce you to active learning approaches to embedded literacy and numeracy support within vocational, workplace and community-based training.

## **Audience:**

The course is ideal for vocational assessors, tutors and support workers in the Voluntary and Community Sector; Train to Gain assessors and brokers, Union Learning Reps and Job CentrePlus Advisers.

## **Content:**

On this course you will have the opportunity to;

- discuss what we mean by embedded support? - the benefits & challenges
- explore a range of active learning approaches to embedded literacy and numeracy teaching and learning
- be guided to useful websites and resources
- consider ‘what next?’ – including an update on further training opportunities
